

Minutes of Meeting of CBHHH Mismanagement

Date: Wednesday 25th June 2020

Place: At the palatial abode of Soft Top and Bicycle Bell

In attendance:

But For What - Joint GM/RA

Tight Fit - Joint GM/RA

Bicycle Bell - Hash Cash

Soft Top - Hasherdashery

Spoons - Hash Flasher

Apologies: - from Seaman Staines - Beer Dray

Meeting started 16.00hrs. Tight Fit was asked to take and write up the Minutes

Hares / Pack Size / Recruitment

With the "loss" of such luminaries as Dead Animal, Blind F*ck, Foxy Lady etc the Hash is now effectively down to 10 regular hares in reality. This puts pressure on Hare availability with haring couples having to do between 4-5 Hares per year.

Average pack sizes have struggled to exceed 15ish.

Decision: It was decided and agreed to push recruitment by taking paid advertising in Costa Blanca News. Tight Fit would look at some wording and costings for a one year placement with an authority to commit up to 150 euros for this task.

Hash Cash Position (Euros)

Here are some relevant facts and deductions

- 1891.50 is being held by zee Germans
- 639.00 is held by Bicycle Bell
- 2530.50 thus being total cash on hand
- Of the 639.00 being held by Bicycle Bell
 - 422.00 has come from Hasherdashery sales
 - C 200.00 has come from profits from Javea event (this being a late consideration by

Tight Fit)

The inevitable conclusion to all this is that we have NOT made any profits from runs since the

beginning of the new Committee term So why is that:

- We are paying more money out (quite rightly) to providers of post-circle Hash Nosh
- We are running with reduced pack sizes

Decision: This is not a bad thing. We are running with healthy coffers so the pressure to “make money” is not required. An increase in pack size (see recruitment above) would be beneficial to the income account.

Stocks

We have about 160 euros worth of ex-Javea bash beer on Seaman Staines / Snakebite’s shag-wagon. We have some items of Hasherdashery stock.

Decision: Seaman needs to condition-taste the beers (big mistake??) in stock (accessible from this kummin Tuesday) to see if they are drinkable. The Hasherdashery stocks are considered as having zero value and the sooner we can rid ourselves of these items the better.

Hasherdashery

CBHHH has a small pack size. We therefore need a simplified approach to Hasherdashery buying.

Decision:

- We need a superbly designed shirt which stands in good stead for run milestones 25, 50, 75, 150, 175. The same shirt to be issued with each milestone but embroidered with name and Run Number.
- We need a second superb shirt/vest as generic, standard garments for general running and for sales to visiting Hashers.
- Milestone 100 and 200 should be something different. As yet undecided.
- We discussed some design ideas and Soft Top undertook to investigate.

Assigning Hash Handles

This is a particular bee in the bonnet of Tight Fit who insists that one of the most important “events” in a new hasher’s life is the Hash Handle. Hash naming should be treated seriously and reverently. It simply isn’t good enough for any of us, individually and at a whim,, to throw out random suggestions with very little knowledge of a newby’s background. A new hasher has to live with that name ... the least we can do is give it some serious thought.

Decisions:

- Hash Handle christenings only to be applied by Committee RA

- The RA will discuss any naming with GM before any christening
- Any recipient of a Hash Handle should have a minimum number of runs under his/her belt before naming. Let's settle on 10 ... unless they do something REALLY stupid beforehand.

All we have to do now is attract some new blood!

Hashing in the Shadow of Covid-19

This issue is going to be with us for some time. So we discussed this problem in length.

Decisions:

- Hares should not set runs through areas where there is likely to be a crowd. Think Javea Port area, Arenal Beach,
- We continue to maintain social distancing during circles and post-circle Hash Nosh
- Use of hash trophies (wigs, bitch bibs, hash penis etc) is suspended for the time being.
- Hash runs shall be free of charge until end August. The use of ex-Javea event beers will soften the financial effect of this initiative (if any are left after Seaman Staines has quality-sampled)
- Hand sanitiser available for all runs

Future Events

Naturally Covid-19 may change these plans but Camping Hash in September is the only consideration on the agenda for now.

Meeting finished at 18.00ish with great food provided by hosts Soft Top and Bicycle Bell
